This is an office action for serial number 10/657,745.

***Election/Restrictions***

Claims 10-15, 22-27, and 32-37 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected Species (as confirmed in telephone interview of March 2, 2006), there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on February 27, 2006.

This application contains claims 10-15, 22-27, and 32-37 drawn to an invention nonelected with traverse in as confirmed in telephone interview of March 2, 2006 and traversed in reply filed on February 27, 2006. A complete reply to the final rejection must include cancellation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 3632

Claims 1-9, 16-21, and 28-31 are rejected under 35 U.S.C. 102(b) as being anticipated by Burrell et al. (Burrell) 3,753,543. Burrell discloses a base (24) having a neck (25) and a stand (26), a retaining section comprising a first section (40) and a second section (42) and a tension mechanism/securing mechanism (46), a brace (10) with adjustable mechanical coupling (38).

### ***Response to Arguments***

Applicant's arguments filed May 31, 2007 have been fully considered but they are not persuasive.

In response to applicant's arguments that Burrell does not teach or suggest a base having a first geometric shape in a first plane to support the container, this argument is herein traversed. Burrell clearly teaches "a base having a first geometric shape in a first plane" as claimed in claim 1 but is further defined within claim 4 to include "a neck and a stand, wherein the stand provides the support for the container and the neck provides the mechanical coupling between the stand and the brace". Burrell clearly teaches as shown in the figure below that the base (24) includes a neck (25) and a stand (26) for supporting a container (18). The applicant also argues that the support ring/stand(as referred to by the examiner within the

Art Unit: 3632

office action) supports or engages the container and not the base however; as pointed out by the applicant's arguments and applicant's own claims Burrell's the base (24) is made up of various parts that form the base which include the support ring/stand (26) and therefore meets the applicant's claimed invention.

### Conclusion

This is an exact replica of applicant's amendment before final. All claims are drawn to the same invention claimed previously by the applicant. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action in this case. See MPEP

Art Unit: 3632

§ 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no, however, event will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
